Hindi

Gujarati

### PROFILE

Experienced Flutter Developer with a passion for crafting seamless mobile experiences. Leveraging one year of hands-on project experience, particularly focused on Freshares applications. Proficient in developing and implementing robust Flutter solutions, adept at translating design concepts into efficient, user-friendly interfaces. Dedicated to staying abreast of emerging technologies and best practices in mobile development. Ready to contribute expertise to innovative projects and drive impactful results in the realm of Flutter development.

### WORK EXPERIENCE

#### Headstart Platform - Flutter Developer

Developed a comprehensive platform aimed at startups, investors, and agents to streamline legal processes using AI-powered document automation.

- Designed and developed the Flutter frontend for user roles: Entrepreneurs, Investors, and Agents.
- Integrated AI-based document generation (e.g., NDAs, term sheets, pitch decks) using third-party or custom ML models.
- Implemented role-based access control and dashboard for different user types.
- Used Firebase for authentication, Firestore for real-time data handling, and Cloud Functions for backend logic.
- Developed form-driven workflows to generate legally compliant documents from user input.
- Built chat functionality to facilitate communication between startups and investors.
- Worked closely with legal advisors to ensure generated documents met compliance standards.
- Deployed a scalable MVP version with scope for multi-language and jurisdictional support.

Technologies: Flutter, Dart, Firebase (Auth, Firestore, Functions), REST API, OpenAI API (if used), GitHub

#### Near 2 you - Flutter Developer

Developed a cross-platform mobile app named N2Y, an innovative booking service platform allowing users to hire service providers for offerings like cleaning, rent-a-friend, and custom help services.

- Built responsive UI for two distinct user roles: Service Seekers and Service Providers.
- Implemented multi-role authentication and dashboard management.
- Created booking flow with calendar integration, time slots, and real-time availability.
- Integrated Google Maps for location selection, route display, and distance-based pricing.
- Enabled service listing and management for providers with custom pricing, descriptions, and availability toggles.

Technologies: Flutter, Dart.
